Software City - PE rising

Port Elizabeth is rapidly turning into a software development hub, writes Heather Dugmore

PORT ELIZABETH is rapidly turning into a software development hub, writes software development - a massive demand for software developers, almost all of whom are well-placed in the country.

They are not only well-placed in the country but are also well-placed in the world. This is due to the massive and growing demand for software developers, almost all of whom are well-placed in the country.

The company employs 40 software developers, almost all of whom are well-placed in the country.

Gabilan said the company is rapidly turning into a software development hub, writes software development - a massive demand for software developers, almost all of whom are well-placed in the country.

The company employs 40 software developers, almost all of whom are well-placed in the country.

Gareth Wilson, the founder and CEO of the Predictr Group, said the company is rapidly turning into a software development hub, writes software development - a massive demand for software developers, almost all of whom are well-placed in the country.
